Policy shall terminate upon payment of the Surrender Value and all other benefits in the Policy shall cease.

Guaranteed Surrender Value (GSV)

For Annuity Option 6, Policy acquires a Guaranteed Surrender Value (GSV) from the first Policy Year.

The GSV for Annuity Option 6 is equal to:

A * Purchase Price less Survival Benefits Paid, if any.

Where, the factor A is 75% in the first three Policy Years and 90% thereafter. Factor A is guaranteed as long as the Annuitant is alive.

GSV is not applicable for Annuity Options 1, 2, 3, 4, 5 and 7.

Special Surrender Value (SSV)

Special Surrender Value is not applicable for Annuity Options 1, 3, and 7.

For Annuity Options 2, 4, 5 and 6, Policy acquires a Special Surrender Value (SSV) from the second Policy Year as calculated below:

For Annuity Options: Option 2, Option 4 and Option 5.

(F1 * Yearly Annuity Amount plus F2 * Purchase Price) less Annuity Instalments paid during the Policy Year of surrender

The factors F1 & F2 depend on the age last birthday at the beginning of the Policy Year of surrender.

In case of Annuity Option 5, age last birthday will be that of the younger Annuitant when both Annuitants are alive.

For Annuity Option 6 (during Deferment Period):

F3 * (F1 * Yearly Annuity Amount plus F2 * 105% of Purchase Price)

The factors F1, F2 depend on the age last birthday at the end of Deferment Period whereas F3 varies by the period to deferment.

For Annuity Option 6 (post Deferment Period):

(F1 * Yearly Annuity Amount plus F2 * 105% * Purchase Price) less Annuity Instalments paid during the Policy Year of surrender

The factors F1 & F2 depend on the age last birthday at the beginning of the Policy Year of surrender.

Yearly Annuity Amount is sum of Annuity Instalment(s) payable over the Policy Year of surrender.

F1, F2 and F3 are Present Value Factors used to convert the expected future benefits to their present value calculated using the interest rate as (30 Year Constant G-Sec Yield + 100 bps, rounded up to the nearest 50 bps) % p.a. as at the end of the month preceding the month of surrender. The basis of the F1, F2 and F3 factors may be revised in future with the prior approval of the Authority.

Whilst F1 and F2 discount the expected future benefits when annuity is in payment, the F3 factor is used to discount the present value of future benefits from end of Deferment Period till the beginning of the Policy Year of surrender.

Surrender is not allowed in case the annuity is:

- a) Purchased from the proceeds or part of the proceeds arising out of the Company's or any other insurer's
- pension plans,
