(Incorporated in HongKong SAR with limited liability)

## **Basel III – Pillar 3 disclosures of India Branches**

For the year ended 31 Mar 2019

## 1. Background and Scope of Application

#### a. Background

The information contained in the document is for the India Branches of The Hongkong and Shanghai Banking Corporation Limited ('the Bank'), which is incorporated and registered in Hong Kong Special Administrative Region ('SAR'). The Bank's ultimate holding company is HSBC Holdings plc, which is incorporated in the United Kingdom. References to 'the Group' within this document mean HSBC Holdings plc together with its subsidiaries.

#### b. Scope of Application

The capital adequacy framework applies to the Bank as per Reserve Bank of India ('RBI') Basel III Capital Regulations vide RBI Circular DBR. No. BP. BC. 1/21.06.201/2015-16 dated July 1, 2015 as amended from time to time. The Bank has a subsidiary, HSBC Agency (India) Private Limited ('HAPL'), which is consolidated in line with Accounting Standard ('AS') – 21 (consolidated financial statements). Full capital deduction is taken in stand-alone financials for investment in HAPL. The Bank holds minority interests (2.07% shareholding) in a Group entity HSBC Professional Services (India) Private Limited which is neither consolidated nor is capital deducted. The investment in this company is appropriately risk weighted. The Bank does not have any other Group company where a pro-rata consolidation is done or any deduction is taken. The disclosure and analysis provided herein are in respect of the Bank, except where required and specifically elaborated, to include other Group entities operating in India.

#### (i) Accounting and prudential treatment / consolidation framework

#### a. Subsidiaries not included in the consolidation

The aggregate amount of capital held by the Bank in HAPL of Rs. 500,000 is not included in the consolidation and is deducted from capital.

# b. List of Group entities in India considered for consolidation under regulatory scope of consolidation:

The RBI guidelines on Financial Regulation of Systemically Important NBFCs and Banks' Relationship vide circular ref. DBOD. No. FSD. BC.46 / 24.01.028/ 2006-07 dated 12 December 2006 read with 'Guidelines for consolidated accounting and other quantitative methods to facilitate consolidated supervision' vide circular ref. DBOD.No.BP.BC.72/ 21.04.018/2001-02 dated 25 February 2003 mandate coverage of the 'Consolidated Bank'. This includes, in addition to the Bank as a branch of Hongkong and Shanghai Banking Corporation Limited, the following Non-Banking Finance Company ('NBFC'), which is a subsidiary of HSBC Holdings plc, held through intermediary holding companies:

Name of Entity /Country of Incorporation	Principle activity of the entity	Total balance sheet equity*	(Rs '000) Total balance sheet assets*
HSBC InvestDirect Financial Services (India) Limited (HIFSL) (Note1)	Non-banking Finance company	1,462,847	5,099,234

\* As stated in the accounting balance sheet of the legal entity as at 31 March 2018

Note 1. HIFSL is 'Systemically important non-deposit taking non-banking financial company' ('NBFC-ND-SI') governed by Reserve Bank of India ('RBI').

(Incorporated in HongKong SAR with limited liability)

#### **Basel III – Pillar 3 disclosures of India Branches** (Continued)

For the year ended 31 Mar 2019

## 1. Background and Scope of Application (Continued)

#### b. Scope of Application (Continued)

As prescribed in the above guidelines, the Bank is not required to prepare consolidated financial statements as it has no shareholding in this entity. However, HIFSL has been considered under regulatory scope of consolidation for the quantitative disclosures including that of capital adequacy computation under Basel III guidelines. Accordingly, HIFSL has been considered under regulatory scope of consolidation.

#### (ii) Bank's total interest in insurance entities

The Bank has no interest in any of the insurance entities of the Group.

(iii) List of Group entities in India not considered for consolidation both for accounting and regulatory scope of consolidation:

 $(P_{a}, (000))$ 

			(Rs <sup>1</sup> 000)
Name of Entity /Country of Incorporation	Principle activity of the entity	Total balance sheet equity*	Total balance sheet assets*
HSBC Asset Management (India) Private Limited	Asset management/portfolio management	615,909	1,565,999
HSBC Electronic Data Processing India Private Limited	Back office / data processing / call centre activities	3,554,678	26,276,888
HSBC Global Shared Services (India) Private Limited	Non-operating company	25,000	48,682
HSBC InvestDirect (India) Limited	Holding company for HSBC InvestDirect Group	712,713	5,051,652
HSBC InvestDirect Employees Welfare Trust			18,586
HSBC InvestDirect Sales & Marketing (India) Limited	Non-operating company	1,000	36,840
HSBC InvestDirect Securities (India) Private Limited	Retail securities broking and related activities	Equity - 875,112 0.001% Compulsory Convertible Preference shares - 870,000	147,690
HSBC Professional Services (India) Private Limited	Providing internal audit services to Group companies	4,838	252,082
HSBC Securities and Capital Markets (India) Private Limited	Stock broking and corporate finance & advisory	Equity - 4,701,139 Preference -250,000	6,596,531
HSBC Software Development (India) Private Limited	Software design, development and maintenance	327,264	28,170,275
Canara HSBC Oriental Bank of Commerce Life Insurance Company Limited	Life insurance	9,500,000	129,698,094

\* As stated in the accounting balance sheet of the legal entity as at 31 March 2018

Note 1: The Bank does not hold any stake in the total equity of the entities mentioned above with the exception of HSBC Professional Services (India) Private Limited.

Note 2: Since the Bank does not hold any stake in the total equity of the entities, the same have not been considered for any regulatory treatment.

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 2. Capital Adequacy & Structure

#### a. Capital Adequacy

The Bank's capital management framework is shaped by its structure, business model and strategic direction. The Bank carefully assesses its growth opportunities relative to the capital available to support them, particularly in light of the economic environment and tightening of regulations around capital requirements. The Bank's Executive Committee ('EXCO'), Risk Management Meeting ('RMM') and Asset-Liability Committee ('ALCO') maintains an active oversight over the Capital and Risk Management framework.

Under Pillar 1 of the RBI guidelines on Basel III, the Bank currently follows Standardised Approach for Credit Risk, Standardised Duration Approach for Market Risk and Basic Indicator Approach for Operational risk capital charge for computation and reporting capital adequacy to RBI. Further, the Bank has a comprehensive Internal Capital Adequacy Assessment Process ('ICAAP'), which covers the capital management policy of the Bank, sets the process for assessment of the adequacy of capital to meet regulatory requirements, support current and future activities and meet the Pillar I and material Pillar II risks to which the bank is exposed to. The ICAAP also involves stress testing of extreme but plausible scenarios to assess the Bank's resilience to adverse economic or political developments and resultant impact on the Bank has robust, forward looking capital planning processes that account for unique and systemic risks. Further, the bank has put in place stringent risk appetite measures as per revised RBI guidelines on Prompt Corrective Action. In addition to the above, the Bank is also subject to Capital Buffers as prescribed by RBI from time to time.

As per the transitional arrangement, at 31 March 2019, the Bank is required to maintain minimum capital requirement including capital buffers as per the table below:

Regulatory Minimum in % as per RBI guidelines	As at 31 Mar 2019
(i) Common Equity Tier I (CET1)	5.50%
(ii) Capital Conservation Buffer (CCB) - (Refer note I)	1.88%
(iii) Counter-cyclical Buffer (CCCB) - (Refer note II)	-
(iv) Domestically Systemically Important Bank (D-SIB) - (Refer note III)	1.96%
Minimum Common Equity Tier I (i+ii+iii+iv)	9.34%
Minimum Tier I Capital	10.84%
Total Minimum Capital Adequacy Ratio	12.84%

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (Continued)

For the year ended 31 Mar 2019

# 2. Capital Adequacy & Structure (Continued)

#### a. Capital Adequacy (Continued)

Notes:

- I. The CCB is designed to ensure that banks build up capital buffers during normal times, which can be drawn down during a stressed period. Banks in India are required to maintain a capital conservation buffer of 2.5%, comprised of CET1 capital, over and above the regulatory minimum capital requirement. The CCB has been implemented w.e.f 31 March 2016 starting with 0.625% in 2016, increasing in a phased-in manner and reaching 2.5% by 31 March 2019. However as per Master circular RBI/2018-19/106 DBR.BP.BC.No.20/21.06.201/2018-19 dated January 10, 2019, the last tranche of 0.625% of Capital Conservation Buffer (CCB) has been deferred from March 31, 2019 to March 31, 2020. Current CCB stands at 1.88%
- II. RBI issued guidelines on CCCB framework for banks in India in February 2015. The CCCB may vary from 0 to 2.5% of total RWA and the decision would normally be pre-announced with a lead time of 4 quarters. The activation of CCCB will depend upon Credit to GDP gap in India (difference between Credit to GDP ratio and the long-term trend value of such ratio of any point in time) along with supplementary indicators such as Credit-Deposit ratio for a moving period of 3 years, industry outlook assessment index and interest coverage ratio. As stated by RBI in First Bi-monthly Monetary Policy Statement, 2018-19 issued on 5 April 2018, a review of CCCB indicators was carried out by the RBI and it has been decided that it is not necessary to activate CCCB in India for FY 2018-19.
- III. The Reserve Bank of India (RBI) released the framework on D-SIB requirements for banks operating in India in July 2014. Banks may become systemically important due to their size, cross-jurisdictional activity, complexity, interconnectedness and lack of substitutability. As per the RBI guidelines, a foreign bank having branch presence in India (such as the Bank) which is classified as Globally Systemically Important Bank (G-SIB) by Financial Stability Board (FSB), has to maintain additional CET1 capital surcharge in India as applicable to it as a G-SIB, proportionate to its Risk Weighted Assets (RWAs) in India. This requirement has been implemented from 31 March 2016 in phased-in manner, to become fully effective from 31 March 2019. Accordingly, 1.96% had been added to minimum requirement towards D-SIB as of March 19.

The Bank continues to monitor developments and believes that current robust capital adequacy position means the bank is well placed for continuing compliance with the Basel III framework.

(Incorporated in HongKong SAR with limited liability)

## 3. Credit risk

#### a. General

Credit Risk is the risk of financial loss if a customer or counterparty fails to meet an obligation under a contract. It arises principally from direct lending, trade finance, marked-to-market exposure from derivative contracts and certain off-balance sheet products such as guarantees and from the Bank's holdings of assets in the form of debt securities.

The principal objectives of our credit risk management function are:

- to maintain a strong culture of responsible lending, and a robust credit risk policy and control framework;
- to both partner and challenge our businesses in defining, implementing and continually reevaluating our credit risk appetite under actual and stress scenario conditions; and
- to ensure there is independent, expert scrutiny of credit risks, their costs and their mitigation.

#### Strategy and Processes

HSBC Holdings plc formulates high-level risk management policies for the HSBC Group entities worldwide. The Bank has also formulated local credit guidelines consistent with HSBC policy and RBI guidelines. The Bank's risk management policies and procedures are subject to a high degree of oversight and guidance to ensure that all types of risk are systematically identified, measured, analyzed and actively managed. The Bank remains a full service bank, servicing all major business groups- Global Banking and Markets (GBM), Commercial Banking (CMB) and Retail Banking and Wealth Management (RBWM).

The Bank has standards, policies and procedures dedicated to the sanctioning, monitoring and management of various risks, which include the following:

- The Board of The Hongkong and Shanghai Banking Corporation Limited in Hongkong SAR (HBAP) has established the India Executive Committee (EXCO) to assist the Board in the running of the Bank. The EXCO is authorized to exercise all the powers, authorities and discretions of the HBAP on the management and day to day running of the Bank, in accordance with the policies and directions set by the Board from time to time. EXCO approves all the policies including credit policies. A Risk Management Meeting (RMM) consisting of senior executives, reviews overall portfolio risks and key risks faced by the bank in India on a monthly basis.
- A Wholesale Credit and Market Risk Management (WMR) unit independent of business with a matrix of delegated approval authorities, undertaking independent reviews and objective assessment of the credit risk for all customers. All large value proposals will be tabled and approved by the Credit Committee (CC). The WMR function has the responsibility of setting and managing strategy, policy, appetite, expectations and standards for wholesale credit and market risk.

(Incorporated in HongKong SAR with limited liability)

## **Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 3. Credit risk (*Continued*)

#### a. General (*Continued*)

#### Strategy and Processes (Continued)

- The RBWM Risk function is responsible for monitoring the quality of the Retail Banking and Wealth Management (RBWM) lending portfolio. For retail lending, INM has developed credit application scorecards, which make use of statistical models & historical data to scientifically assess the borrowers. This may also be supplemented with judgmental lending as appropriate. Policy rules are built into the system to enable online checks. The Bank also deploys other tools like external verifications, negative customer database search & most importantly credit bureau checks through the Credit Information Bureau (India) Limited (CIBIL). The judgmental aspect also tries to identify the financial strength, ability and intentions of borrowers for repayment.
- Starting 1 Jan 2017, First Line of Defense (FLOD) activities of Underwriting and Collections team have been merged into a new unit called Credit Control Services (CCS) which at an entity level reports into the RBWM Chief Operating Office and functionally into the Regional CCS structure. FLOD underwriting decisions cases within the approved policy parameters whereas exceptions / deviation proposals are approved by the RBWM Risk Second Line of Defense (SLOD) underwriting team.
- For retail risk, the INM RBWM risk and Acquisition and Account Risk Management Team reviews and communicates the various internal risk policies. The RRPs (Risk reward program) defines the product parameters for RBWM.
- A robust framework for Risk Appetite Statements (RAS) and Risk Tolerance triggers for all material risks. The Risk Management committee reviews and regularly monitors the compliance with RAS. The Bank has stipulated Credit Risk Appetite and tolerance triggers for asset quality, impairments, risk weighted assets, risk adjusted returns and concentration risks.
- Designing of comprehensive credit risk policies for management of Exposure norms and Country Risk Plan. These policies delineate the Bank's risk appetite and maximum permissible exposures to individual customers, customer groups, industries, sensitive sectors and other forms of credit risk concentrations.
- The bank also has comprehensive policies for valuation, end use monitoring, real estate exposures, management of intra-group exposures, provisioning, distressed assets and recovery and sale of NPA.
- Sustainability risk policies to ensure sustainable financing in accordance with the group guidelines.
- Stress Testing Policy & Framework for rigorous risk specific and Enterprise-wide stress testing and reporting.
- Managing exposures to debt securities by establishing controls in respect of the liquidity of securities held for trading and setting issuer limits for financial investments. Separate portfolio limits are established for asset-backed securities and similar instruments.
- Controlling of cross-border exposures to manage country and cross-border risk through the imposition of country limits with sub-limits by maturity and type of business.

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## **3.** Credit risk (*Continued*)

#### a. General (*Continued*)

#### Strategy and Processes (Continued)

• Maintaining and developing HSBC's risk rating framework and systems to classify exposures meaningfully and facilitate focused management of the risks involved. Rating methodologies are based upon a wide range of financial analytics together with market data-based tools, which are core inputs to the assessment of customer risk. For larger facilities, while full use is made of automated risk rating processes, the ultimate responsibility for setting risk ratings rests with the final approving executive. Risk grades are reviewed frequently and amendments, where necessary, are implemented promptly.

#### Structure and Organisation

The Risk function is responsible for the quality and performance of its credit portfolios and for monitoring and controlling all credit risks in its portfolios.

Credit underwriting is processed at different levels (country, region, Group) depending on size and complexity of proposals and by different teams (FIs / Corporate / Trade / Cross-Border Approvals). Credit approval authorities are delegated from the Chief Risk Officer at the Regional Head Office in Hong Kong to the CEO, India and the CRO, India. The CRO in India maintains a functional reporting line to the CRO in Hong Kong. The delegation of limits to Head WMR, WMR executives including LMU will be approved by EXCO, and the CRO will only communicate the delegated limits to the respective staff. For Retail, the ASP Head of RBWM Risk delegates lending authority to the India RBWM Risk Head who, in turn, delegates the lending authority to underwriters in RBWM Risk and CCS. For certain customer types, the approval is granted either ASP Risk/ Group Risk basis the recommendation of India WMR. Relationship management of problem accounts or downgrades in certain internal ratings are transferred to LMU (Loan Management Unit) within Risk.

#### Scope and nature of risk reporting, measurement, monitoring and mitigation

The Bank manages and directs credit risk management systems initiatives. HSBC has constructed a centralized database covering substantially all of the Group's direct lending exposures, to deliver an increasingly granular level of management reporting.

The Bank performs regular reporting on its credit risk portfolio (wholesale & retail), to include information on large credit exposures, concentrations, industry exposures, levels of impairment provisioning, delinquencies, LTVs and country exposures to various internal governance forums. The analysis of the portfolio is also presented to the RMM monthly.

(Incorporated in HongKong SAR with limited liability)

## **Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 3. Credit risk (*Continued*)

#### a. General (Continued)

#### Non-performing advances

Non-performing advances are identified by periodic appraisals of the portfolio by management or in accordance with RBI guidelines, whichever is earlier.

Specific provisions are made on a case by case basis based on management's assessment of the degree of impairment of the advances (including mortgage loans but excluding other homogeneous retail loans), subject to the minimum provisioning levels prescribed by the RBI. Where there is no longer any realistic prospect of recovery, the outstanding advance is written off.

Special attention is paid to high risk exposures, which are subject to more frequent and intensive review and reporting, in order to accelerate remedial action. The bank engages with customers closely to work out of distress situations.

Subject to the minimum provisioning levels prescribed by the RBI, the provision on homogeneous unsecured loans relating to retail business is assessed on a portfolio basis using the historical loss and/or net flow rate method.

#### b. Quantitative disclosures for portfolios under the Standardised approach

•	9,242,663

## 4. Disclosures for portfolios under the Standardised approach

The Bank uses the following External Credit Assessment Institutions (ECAIs) approved by RBI to calculate its capital adequacy requirements under the Standardised approach to credit risk for Corporate, Bank and Sovereign counterparties.

Domestic ECAIs for external ratings of Indian Corporates:

- a) Credit Analysis and Research Limited (CARE)
- b) CRISIL Limited
- c) India Ratings and Research Private Limited (FITCH)
- d) ICRA Limited
- e) Brickwork Ratings India Pvt Limited
- f) ACUITE
- g) Infomerics

The Bank used the ratings issued by the ECAIs (for both long term and short term facilities) to risk weight both funded as well as non-funded exposures to corporate customers.

The process used by the Bank to transfer public issue ratings onto comparable assets in the banking book is in line with RBI Master Circular on Basel-III Capital Regulations dated 01 July 2015.

For assets in the Bank's portfolio that have contractual maturity less than or equal to one year, short term ratings accorded by the chosen credit rating agencies are considered relevant. For other assets, which have a contractual maturity of more than one year, long term ratings accorded by the chosen credit rating agencies are considered relevant.

The mapping of external credit ratings and risk weights for corporate exposures is provided in the grids below:

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (Continued)

For the year ended 31 Mar 2019

## 4. Disclosures for portfolios under the Standardised approach (*Continued*)

Risk weight mapping of Long term and short term corporate ratings

Long Term Ratings of all ECAIs	Risk weights					
AAA	20%					
AA	30%					
А	50%					
BBB	100%					
BB & Below	150%					
Unrated	100%*					
		Short	Term Ratings			Risk weights
CARE	CRISIL	FITCH	ICRA	BRICKWORK	ACUITE	
CARE A1 +	CRISIL A1 +	FITCH A1 +	ICRA A1 +	BRICKWORK A1+	ACUITE A1+	20%
CARE A1	CRISIL A1	FITCH A1	ICRA A1	BRICKWORK A1	ACUITE A1	30%
CARE A2	CRISIL A2	FITCH A2	ICRA A2	BRICKWORK A2	ACUITE A2	50%
CARE A3	CRISIL A3	FITCH A3	ICRA A3	BRICKWORK A3	ACUITE A3	100%

CARE D	CRISIL D	FITCH D	ICRA D	BRICKWORK D	ACUITE D	150%
Unrated	Unrated	Unrated	Unrated	Unrated	Unrated	100%*

\* As per RBI guidelines dated 25<sup>th</sup> Aug 2016, Exposures to Corporates, AFCs and NBFC-IFCs having aggregate exposure to banking system > INR 100 crores which are currently rated but becomes unrated subsequently, the risk weights need to be increased to 150% with immediate effect.

In August 2016, RBI issued guidelines for revising the risk weights for unrated exposures to Corporates, AFCs, and NBFC-IFCs having aggregate exposure from banking system > INR 200 crore to 150% from 100% w.e.f 30 June 2017. The implementation of these guidelines has been deferred by RBI until 01 April 2019.

The claims on banks incorporated in India and foreign banks branches in India, excluding investment in equity shares and other instruments eligible for capital status (*Investments referred to in paragraph 5.6.1 (i) & (ii) of RBI Master circular on Basel-III Capital Regulations dated 01 July 2015*), are risk weighted as shown below:

Claims on Banks Incorporated in India and Foreign Bank Branches in India	Risk V	Weights%
Level of Common Equity Tier 1 capital (CET1) including applicable capital conservation buffer (CCB) (%) of the investee bank (where applicable)	Scheduled Banks	Other Banks
Applicable Minimum CET1 + Applicable CCB and above	20%	100%
Applicable Minimum CET1 + CCB = 75% and <100% of applicable CCB	50%	150%
Applicable Minimum CET1 + CCB = 50% and <75% of applicable CCB	100%	250%
Applicable Minimum CET1 + CCB = 0% and <50% of applicable CCB	150%	350%
Minimum CET1 less than applicable minimum	625%	625%

## 5. Policy for Collateral Valuation and Management

The Bank has policies and manuals for collateral management and credit risk mitigation techniques, which include among other aspects guidelines on acceptable types of collateral, ongoing monitoring of collateral including the frequency and basis of valuation and application of credit risk mitigation techniques.

The Bank's approach when granting credit facilities is to do so on the basis of capacity to repay rather than placing primary reliance on credit risk mitigants. Depending on a customer's standing and the type of product, facilities may be provided unsecured. Mitigation of credit risk is a key aspect of effective risk management for the bank.

Where credit risk mitigation is available in the form of an eligible guarantee, the exposure is divided into covered and uncovered portions. The covered portion, which is determined after

applying an appropriate 'haircut' for currency and maturity mismatch to the amount of the protection provided, attracts the risk weight of the protection provider. The uncovered portion attracts the risk weight of the obligor.

All deeds of ownership/titles related to collateral are held in physical custody under control of executives independent of the business.

Valuation strategies are established to monitor collateral mitigants to ensure that they will continue to provide the anticipated secure secondary repayment source. For mortgages, the credit policy clearly outlines the acceptable Loan to value ratio (LVR) for different types of properties. The maximum LVR offered to customers has been capped at 80% for loans upto INR 7.5 Mn and 75% or lower for loans greater than INR 7.5 Mn. The valuation of property is initiated through a bank-empaneled valuer who is an expert on the subject matter. Additionally, as per the Bank's Risk Valuation Policy, in some cases where real estate is held as a security, dual valuations are initiated in order to have the benefit of a second opinion on the mortgaged property. Retail risk has a board-approved valuation policy which includes conditions when dual valuation is done. The disbursal of the loan is handled through an empaneled lawyer who in exchange collects the security documents from the borrower. The property documents thus collected are stored in central archives in a secure manner.

An in-house Property Price Index (PPI) has been developed which is used to measure the actual LVR of the properties financed by the Bank. The methodology for PPI development has been approved by Retail Risk and refreshed every 6 months. However, should a loan become a non-performing asset (NPA), a fresh valuation is initiated through the bank-empanelled valuer and the provisions applicable are calculated accordingly.

(Incorporated in HongKong SAR with limited liability)

For the year ended 31 Mar 2019

## 5. Policy for Collateral Valuation and Management (*Continued*)

#### Main Types of Collateral taken by the Bank

As stipulated by the RBI guidelines, the Bank uses the comprehensive approach for collateral valuation for RWA computation. Under this approach, the Bank reduces its credit exposure to counterparty when calculating its capital requirements to the extent of risk mitigation provided by the eligible collateral as specified in the Basel III guidelines. The Bank adjusts the value of any collateral received to adjust for possible future fluctuations in the value of the collateral in line with the requirements specified by RBI guidelines. These adjustments, also referred to as 'haircuts', to produce volatility-adjusted amounts for collateral, are reduced from the exposure to compute the capital charge based on the applicable risk weights. The Bank reckons the permitted credit risk mitigants for obtaining capital relief only when the credit risk mitigant fulfills the conditions stipulated for eligibility and legal certainty by RBI in its guidelines on Basel III.

The main types of recognised collateral taken by the Bank appear in the list of eligible financial collaterals advised in RBI Master circular on Basel III Capital Regulations issued in July 2015, and include cash on deposits. Further the main types of recognised collateral taken by the Bank for mortgages include plots of land, ready possession and under construction properties.

#### Main Types of Guarantor Counterparty and their Creditworthiness

As stated in Section 7.5.6 of the RBI's Master circular on Basel-III guidelines, certain guarantees are recognised for credit risk mitigation purposes. Where guarantees are direct, explicit, irrevocable, unconditional and meeting all operating guidelines prescribed by RBI, the Bank may take account of such credit protection in calculating capital requirements. The main types of guarantees are from Sovereigns, sovereign entities (including Bank for International Settlements (BIS), International Monetary Fund (IMF), European Central Bank and European Community as well as those Multilateral Development Banks (MDBs) referred to in paragraph 5.5 of the RBI's Master circular on Basel-III guidelines, Export Credit Guarantee Corporation of India Ltd (ECGC) and Credit Guarantee Fund Trust for Micro and Small Enterprises (CGTSI), Credit Guarantee Fund Trust for Low Income Housing (CRGFTLIH)), banks and primary dealers with a lower risk weight than the counterparty. Other entities that are externally rated are also eligible guarantors, except when credit protection is provided to a securitisation exposure. This would include credit protection provided by parent, subsidiary and affiliate companies when they have a lower risk weight than the obligor.

#### Information about (Market or Credit) Risk Concentrations within the mitigation taken

The quantum of the credit portfolio which benefits from financial collaterals and/or guarantees as credit risk mitigants is an insignificant portion of the customer advances of the Bank.

The total exposure (including non-funded post Credit Conversion Factors) that is covered by eligible financial collateral and eligible Guarantees is as below

		(Rs '000)
	As at 31 Mar 19	As at 31 Mar 18
Exposure covered by Financial Collaterals	31,993,616	42,722,221
Exposure covered by Guarantees	39,956,138	11,817,239

(Incorporated in HongKong SAR with limited liability)

## **Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 6. Securitisation disclosure for Standardised approach

The Bank acts as originator, servicer and investor in securitisation transactions. The Bank's strategy is to use securitisation to diversify our sources of funding for asset origination, capital efficiency, managing liquidity and meet the priority sector lending (PSL) requirements. The Bank also undertakes 'purchase' transactions through the direct assignment route.

The Bank participates in securitisation transactions in any or all of the following roles:

- Originator: The Bank uses Special Purpose Vehicle (SPV) to securitise customer loans and advances that we have originated, in order to diversify our sources of funding for asset origination and for capital efficiency purposes. In such cases, we transfer the loans and advances to the SPVs for cash, and the SPVs issue debt securities to investors to fund the cash purchases. Credit enhancements to the underlying assets may be used to obtain investment grade ratings on the senior debt issued by the SPVs.
- Servicer: For sold assets, the Bank undertakes the activity of collections and other servicing activities such as managing collections and monthly payouts to investors / assignee with respect to the underlying assets.
- Investor: The Bank invests in Pass Through Certificates (PTCs) primarily to meet its priority sector lending requirements. We have exposure to third-party securitizations which are reported as investments. These securitisation positions are managed by a dedicated team that uses a combination of market standard systems and third party data providers to monitor performance and manage market and credit risks.

#### Valuation of securitisation positions

The investments of the Bank in PTCs have been marked to market on the basis of the Base Yield Curve and the applicable spreads as per the spread matrix relative to the Weighted Average Maturity of the paper as notified by Fixed Income Money Market and Derivative Association of India (FIMMDA).

#### Securitisation accounting treatment

The accounting treatment applied is as below:

- Originator: Securitised assets are derecognized upon sale if the true sale criteria are fully
  met and the bank surrenders control over the contractual rights that comprise the financial
  asset. In respect of credit enhancements provided or recourse obligations accepted by the
  Bank, appropriate provision/ disclosures is made in accordance with AS 29 'Provisions,
  contingent liability and contingent assets'. Gains on securitisation, being the excess of
  consideration received over the book value of the loans and provisions against expected
  costs including servicing costs and the expected delinquencies are amortized over the life
  of the securities issued by the SPV. Losses are recognised immediately. Sale and transfer
  that do not meet the above criteria are accounted for as secured borrowings.
- Servicer: In case the Bank acts as servicer of the securitisation deal the fees charged for servicing the loans would be recognised on an accrual basis.
- Investor: The investment in PTCs are accounted for as Available for Sale (AFS) investments and valued as per the note above. The loan assignment deals are classified as advances.

(Incorporated in HongKong SAR with limited liability)

## **Basel III – Pillar 3 disclosures of India Branches** (Continued)

For the year ended 31 Mar 2019

## 6. Securitisation disclosure for Standardised approach (*Continued*)

#### Securitisation regulatory treatment

- Originator: In case the loan is de-recognised from the books, no capital needs to be maintained by the Bank, however the Bank is required to maintain capital for credit enhancements provided in line with the RBI guidelines.
- Servicer: No impact on capital.
- Investor: The Bank uses the issue specific rating assigned by eligible ECAI's to compute the RWAs of the investment in the PTCs.

#### ECAI's used

The Bank uses one of the following ECAIs for all types of securitisation deals:

- a) Credit Analysis and Research Limited (CARE)
- b) CRISIL Limited
- c) India Ratings and Research Private Limited (FITCH)
- d) ICRA Limited
- e) Brickwork Ratings India Pvt Limited
- f) ACUITE
- g) Infomerics

#### **Details of Securitisation trades of the Bank**

*(i) Details of securitisation of standard assets* 

The Bank has not Securitised any standard assets in the current year (previous year-Nil)

The RBI issued addendum guidelines on securitisation of standard assets vide its circular dated 7 May2012, subsequent to this date the Bank has not originated any securitisation transaction.

(ii) Securitisation of impaired/past due assets

The Bank has not Securitised any impaired/past due assets (Previous year Nil).

(iii) Loss recognised on securitisation of assets

The Bank has not recognised any losses during the current year for any securitisation deal (Previous year Nil).

*(iv)* Securitisation exposures retained or purchased

The Bank has made investments in Pass Through Certificates (PTCs) of Rs. 85,703 million as at 31 March 2019 (previous year Rs. 81,340 million). These attract a risk weight of 20% since they are AAA rated instruments.

(Incorporated in HongKong SAR with limited liability)

## **Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 7. Market risk in trading book

The objective of the HSBC's market risk management is to manage and control market risk exposures in order to optimize return on risk while maintaining a market profile consistent with our risk appetite.

Market risk is the risk that movements in market factors, including foreign exchange rates, interest rates, credit spreads and equity prices will reduce our income or the value of our portfolios. Market risk arises on financial instruments, which are measured at fair value in the trading book.

#### **Strategy and Processes**

The Bank separates exposure to market risk into Trading book and Accrual book. Trading book includes positions arising from market-making customer demand driven inventory.

Accrual book includes positions that arise from the interest rate management of the Bank's retail and commercial banking assets and liabilities, financial investments designated as available-for-sale and held-to-maturity.

The risk components apply equally to cash and to derivative instruments. All open market risk is subject to approved limits. Limits are established to control the level of market risk and are complementary to counterparty credit limits.

The existence of a market risk trading limit does not confer any credit, counterparty, country or sovereign risk limit; they are established separately through normal credit procedures.

#### Structure and Organisation of management of risk

The management of market risk is undertaken in Markets using risk limits approved by an independent Risk function. Limits are set for portfolios, products and risk types. The level of market risk limits set for each operation depends upon the market liquidity, financial and capital resources of the business, the business plan, the experience and track record of the management, dealers and market environment, as well as the Group's risk appetite. Market risk limits are reviewed annually.

Global Risk, an independent unit within the Group, is responsible for our market risk management policies and measurement techniques. At local level, the Bank has a Market Risk Management function, independent of Markets, which is responsible for measuring market risk exposures in accordance with the Group policies, and monitoring and reporting these exposures against the prescribed limits on a daily basis.

#### Scope and nature of risk measurement, reporting and monitoring

The Bank employs a range of tools to monitor and limit market risk exposures. These include position limits, sensitivity analysis (PVBP limits), stop loss limit, VaR, Stressed VaR and stress testing.

While VaR provides a measure of the market risk in the Bank, sensitivity analysis (e.g Present Value of 1 basis point (PV01)) and VaR are more commonly utilised for the management of the business units. Stress testing and stressed VaR complement these measures with estimates of potential losses arising from market turmoil.

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

# 7. Market risk in trading book (*Continued*)

The Bank's VaR and stressed VaR models are predominantly based on historical simulation. VaR measures are calculated to a 99% confidence level and use a one-day holding period, whereas stressed VaR uses a 10-day holding period. The accuracy of VaR models is routinely validated by back-testing the actual daily profit and loss results, adjusted to remove non-modelled items such as fees and commissions, against the corresponding VaR numbers.

Market Risk Limits are proposed by Local Global Markets. The Local Market Risk function reviews the market risk limits and provides its endorsement as appropriate to the Regional Market Risk Management for approval. After regional concurrence, the proposed mandates are tabled to INM EXCO for approval. Upon approval, the limits are formally delegated by the CEO to the Head of Global Markets, who in turns delegates limits to its different Front office desks. These limits are monitored daily by the Bank's Market Risk Management function through system reports and advised to senior management on an ongoing basis. Any breaches in the internal and regulatory market risk limits set as part of internal risk policy is reported to the senior management immediately and is also tabled at the RMM and EXCO for discussion.

(*i*) Capital requirements for market risk for the bank

		(Rs'000)
Standardised Duration Approach	As at 31 Mar 2019	As at 31 Mar 2018
Interest rate risk	19,992,130	14,870,659
Foreign exchange risk	1,588,950	1,112,400
Equity risk	392,467	336,166
Securitisation exposure	4,002,630	3,688,338
Capital requirements for market risk	25,976,177	20,007,563

### 8. **Operational risk**

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, including legal risk. It is inherent in every business organisation and covers a wide spectrum of issues.

#### **Strategy and Process**

The Bank manages this risk within a control-based environment in which processes are documented, authorisation is independent and transactions are reconciled and monitored. This is supported by an independent programme of periodic reviews undertaken by internal audit and internal control departments, and continuous reviews by concurrent audit and by monitoring external operational risk events, which ensure that the Bank stays in line with industry best practice and takes account of learnings from publicised operational failures within the financial services industry.

#### Structure and Organisation

The Risk Management Meeting (RMM) is the apex body at an entity level that is responsible for oversight and management of all risks in INM. Additionally, for Financial Crime risk (FCR) management and oversight, INM has a Financial Crime Risk Management Committee (FCRMC) at an entity level. Both these governance meetings are the apex risk management bodies of the bank and report to the EXCO. INM Operational Risk Working Group (ORWG)

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

## 8. **Operational risk** (*Continued*)

#### Structure and Organisation\_(*Continued*)

is responsible for providing guidance, advice and challenge in embedding of the ORMF in INM and reports into FCRMC and RMM.

At individual business level, there are Business Control Committees (BCC)/ Risk Management forum that are responsible for oversight and management of all risks. Similar bodies specializing in FCR risks also exists at business level. Theses bodies escalate/ report to RMM and FCRMC respectively.

#### Three Lines of Defence (3LOD) Overview

The 3LOD model is an organisational structure that outlines the division of roles and responsibilities, defined by the activities performed. It is applicable to all individuals and to all risk types. There should be a clear segregation between risk ownership (First LOD), risk oversight (Second LOD) and independent assurance (Third LOD) to help support the Bank in the effective identification, assessment, monitoring, management, and reporting of risks.

#### **First Line of Defence**

The First LOD has ultimate ownership for risk and controls. It comprises of three key roles: 'Risk Owners', 'Control Owners' and 'Business Risk and Control Managers' ("BRCM"). Individuals can be both Risk Owners and Control Owners, depending on the activity(ies) they are undertaking.

Risk Owners sit in the Global Businesses and are accountable for agreeing risk appetite and identifying, assessing, and managing risks for their business in line with the risk appetite set by the Board.

Control Owners may sit within a Global Business, Global Function or a third party. They are responsible for assessing and managing the processes, activities, or systems to ensure that they are operating effectively. They work with the Risk Owners to understand and manage the risks.

The BRCMs may sit within a Global Business, Global Function or geographic CEO or Chief

Operating Officer structure. They are responsible for providing operational risk advice and control testing for their organisational area. They work closely with Risk Owners and Control Owners to ensure operational risk management activities are effectively executed.

#### Second Line of Defence

The Second LOD review and challenge the activities of the First LOD to ensure that they have met the minimum requirements for risk management. The Second LOD consists of 'Risk Stewards' who are independent of the commercial risk-taking activities undertaken by the First LOD.

Risk Stewards sit within the Global Functions. They perform the specialist role of setting policies and the oversight of the First LOD activities for their given risk type. There are regional, country and global business Risk Stewards throughout the Organisation who execute the responsibilities cascaded to them by the global Risk Steward.

Global Functions with both First and Second LOD responsibilities must segregate these responsibilities across teams Individuals will therefore be aligned to a single LOD. At an appropriate level of seniority (normally executive level), a single individual may have responsibilities across the First and Second LOD.

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 8. Operational risk (*Continued*)

The Operational Risk function provides advice and guidance on the use of the Operational Risk Management Framework. Operational Risk also challenges the effectiveness of the Operational Risk Management Framework in use by the First LOD and Risk Stewards.

#### Third Line of Defence

The Third LOD is Global Internal Audit. They provide independent assurance to management and the non-executive Risk and Audit Committees that our risk management, governance and internal control processes are designed and operating effectively.

#### Scope and Nature of Risk reporting, monitoring and mitigation

The Bank has codified its operational risk management process in a high level standard, supplemented by more detailed formal guidance. This explains how the Bank manages operational risk by identifying, assessing, monitoring, controlling and mitigating the risk, rectifying operational risk events, and implementing any additional procedures required for compliance with RBI requirements.

Information systems are used to record the identification and assessment of operational risks and to generate appropriate, regular management reporting.

Assessments are undertaken of the operational risks facing businesses and the risks inherent in its processes, activities and products. Risk and Control Assessment is done dynamically on occurrence of 'Trigger Event'.

A regular report on operational losses is made to the Bank's senior management through the RMM.

#### (i) Capital requirements for Operational risk for the Bank

		(Rs'000)
	As at 31 Mar 19	As at 31 Mar 18
Capital required for Operational Risk (Basic Indicator Approach)	16,065,991	14,814,626

## 9. Interest rate risk in the banking book (IRRBB)

Interest rate risk in the banking book (IRRBB) refers to the current or prospective risk to the bank's capital and earnings arising from adverse movements in interest rates that affect the bank's banking book positions. When interest rates change, the present value and timing of future cash flows change. This in turn changes the underlying value of a bank's assets, liabilities and off-balance sheet items and hence its economic value. Changes in interest rates also affect a bank's earnings by altering interest rate-sensitive income and expenses, affecting its Net Interest Income (NII).

Asset, Liability & Capital Management (ALCM) is responsible for measuring and controlling IRRBB under the supervision of the Asset and Liability Management Committee (ALCO).

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 9. Interest rate risk in the banking book (IRRBB) (*Continued*)

Its primary responsibilities are

- To define the rules governing the transfer of interest rate risk from the commercial bank to Balance Sheet Management (BSM);
- To ensure that all market interest rate risk that can be hedged is effectively transferred from the global businesses to BSM; and
- To define the rules and metrics for monitoring the residual interest rate risk in the global businesses.

Market risk in the banking book arises principally from structural mismatches in assets and liabilities and from off-balance-sheet instruments arising from repricing risk, yield curve risk and basis risk.

Further, an analysis of these risks incorporates assumptions on optionality in certain products such as in mortgage prepayments, and from behavioral assumptions regarding the economic duration of liabilities which are contractually repayable on demand, for example, current accounts.

IRRBB is monitored as part of the Bank's Internal Capital Adequacy Assessment Process and capital maintained, if required, based on this assessment.

#### Strategy and Process

In order to manage this risk efficiently, interest rate risk in the banking book is transferred to BSM.

The transfer of interest risk to the BSM is achieved through a formal transfer pricing framework wherein a series of internal deals are executed between the business units and BSM. In certain products, the interest rate risk behaviour may differ from the contractual nature thereby requiring a study to determine the correct approach in managing the risk. This is achieved through a behaviouralisation study that is periodically updated and placed before the ALCO for approval, along with underlying assumptions.

#### Structure and Organisation

The Bank has an independent interest rate risk management and control function which is responsible for measuring interest rate risk exposures in accordance with prescribed policies, monitoring and reporting these exposures against the approved limits on a daily basis. This monitoring process effectively builds on the level of interest rate risk that is commensurate with the capital held.

#### Scope and nature of Risk reporting, measurement, monitoring and mitigation

The Bank monitors the sensitivity of projected net interest income under varying interest rate scenarios. The Bank effectively identifies, measures, monitors and controls the interest rate risk in the banking book, to mitigate the impact of prospective interest rate movements which could reduce future net interest income, whilst balancing the cost of such hedging activities on the current income stream.

The Bank manages the interest rate risk arising from commercial banking activities in order to maximize the return commensurate with its capital base, without exposing the Bank to undue risk arising from movements in market interest rates.

(Incorporated in HongKong SAR with limited liability)

For the year ended 31 Mar 2019

## 9. Interest rate risk in the banking book (IRRBB) (Continued)

#### (i) Impact on Economic Value of Equity(EVE)

Economic Value of Equity (EVE) measures the impact of 200 bps movement in interest rates on capital. When interest rates change, the present value and timing of future cash flows change. This in turn changes the underlying value of a bank's assets, liabilities and off-balance sheet items and hence its economic value.

		(Rs in Million)
	As at 31 March 2019	As at 31 March 2018
Base		
Total EVE	282,982	265,653
Total Regulatory Capital	212,962	194,723
+200 bps		
EVE	260,092	252,749
EVE Sensitivity	(22,890)	(12,905)
EVE Sensitivity / Total		
Regulatory Capital	-10.75%	-6.63%
-200 bps		
EVE	308,155	279,992
EVE Sensitivity	25,172	14,339
EVE Sensitivity / Total		
Regulatory Capital	11.82%	7.36%
EVE Limit	18.00%	18.00%

#### (ii) Impact on Earnings (NII)

Changes in interest rates also affect a bank's earnings by altering interest rate-sensitive income and expenses, affecting its Net Interest Income (NII).

		(Rs in Million)
Projected NII for next 12 months	<b>As at 31 Mar 2019</b> 48,794	As at 31 March 2018 46,986
Parallel movement in yield curve		
+100bps	(1,783)	(930)
-100bps	2,104	1,398

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## **10.** Counterparty Credit Risk

# Methodology used to assign economic capital and credit limits for counterparty credit exposures

Counterparty credit risk arising from over-the-counter (OTC) derivatives is calculated in both the trading and non-trading books, and is the risk that a counterparty to a transaction may default before completing the satisfactory settlement of the transaction on any foreign exchange, interest rates, or equity contracts. An economic loss occurs if the transaction or portfolio of transactions with the counterparty has a positive economic value at the time of default.

As per the RBI Master circular on Basel-III Capital Regulations dated 01 July 2015, banks are expected to use the Standardised method for computation of counterparty credit exposure using the Current Exposure Method (CEM) for market related off balance sheet exposures. Under this method the exposure on all the derivative contracts is calculated as the sum of current credit exposure/replacement cost i.e. the sum of the positive mark-to-market (MTM) of the contracts (negative MTMs are to be ignored) and the potential future exposure (PFE). PFE is determined based on a set percentage multiplied by the notional of the deal. The percentage by which the notional is multiplied is dependent upon the type of the product and the tenor as prescribed in RBI guidelines. PFE so obtained is added to the gross positive replacement cost to arrive at the final exposure at default.

Bilateral netting of counterparty credit exposures, in derivative contracts, i.e bilateral netting of MTM values arising on account of such derivative contracts is not permitted. Accordingly, only gross positive MTM value of such contracts is considered for the purposes of exposure computation for capital adequacy.

The Group assesses total economic capital requirements centrally for the risk by utilising the embedded operational infrastructure used for the Pillar 1 capital calculation.

Limits for counterparty credit risk exposures are assigned within the overall credit process for distinct customer limit approval.

#### Policies for securing collateral and establishing credit reserves

Despite these being a standard credit mitigant for OTC derivatives in most jurisdictions, market practice in this respect is still evolving in India. The bank has executed a few Credit Support Annexes (CSA's) and is currently negotiating with some more counterparties. The credit valuation adjustment (CVA) is an adjustment to the value of OTC derivative transaction contracts to reflect, within fair value, the possibility that the counterparty may default or migrate to a lower credit grade, and we may not receive the full market value of the transactions. The Bank calculates a separate CVA for each counterparty to which the bank has exposure. The adjustment aims to calculate the potential loss arising from the portfolio of derivative transactions against each third party, based upon a modeled expected positive exposure profile, including allowance for credit risk mitigants such as netting agreements and CSA's.

The bank computes a CVA for its markets related off balance sheet exposures and takes it to the profit and loss account for financial reporting purposes. The same was implemented for

(Incorporated in HongKong SAR with limited liability)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

# 10. Counterparty Credit Risk (Continued)

capital adequacy purposes under Basel III in line with RBI Guidelines from quarter ending June 2014.

#### Wrong-way Risk exposures

Wrong-way risk is a form of concentration risk and arises when there is a strong correlation between the counterparty's Probability of Default (PD) and the MTM value of the underlying transaction. The Bank uses a range of procedures to monitor and control wrong-way risk, including requiring prior approval before undertaking wrong-way risk transactions outside preagreed guidelines.

#### **<u>Central Counterparties</u>**

Whilst exchange traded derivatives have been cleared through central counterparties ('CCP's) for many years, recent regulatory initiatives designed to reduce systemic risk in the banking system are directing increasing volumes of OTC derivatives to be cleared through CCPs. The Bank has accordingly developed a risk appetite framework to manage risk on CCPs.

#### **Impact of Credit Rating Downgrade**

The Credit rating downgrade clause in an International Swaps and Derivatives Association (ISDA) Master Agreement is designed to trigger a series of events which may include the requirement to pay or increase collateral, the termination of transactions by the non-affected party, or assignment by the affected party, if the credit rating of the affected party falls below a specified level. At the Group level, we assess additional collateral requirements where credit ratings downgrade language affects the threshold levels within a collateral agreement.

The derivative exposure is calculated using Current Exposure Method ('CEM'). The outstanding balances are given below:

				(Rs'000)
Particulars	Α	s at 31-Mar-19		As at 31-Mar-18
		Current credit		Current credit
	Notional	exposures	Notional	exposures
Currency Swaps	191,430,718	31,077,580	181,324,779	29,314,716
Forward Contracts	1,427,215,453	64,930,424	1,043,119,391	38,288,929
FX options	392,642,430	17,822,694	200,639,047	11,639,251
Interest rate options	430,298	7,314	5,234,949	241,314

## **Basel III – Pillar 3 disclosures of India Branches** (Continued)

For the year ended 31 Mar 2019

## 11. Leverage Ratio

The leverage ratio requirement was introduced into the Basel III framework as a non-riskbased limit, to supplement risk-based capital requirements. It aims to constrain the build-up of excess leverage in the banking sector. As per the Bi-Monthly Monetary policy committee held on 6th Jun 2019, RBI has advised banks to maintain the minimum leverage ratio at 3.5%. The bank's leverage ratio is calculated as per RBI guidelines as follows:

	Leverage Common disclosure:		(Rs in Million)
Sr No	Item	At 31 March 2019	At 31 March 2018
	On-balance sheet exposures		
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	1,604,453	1,314,887
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	(138)	(91)

**Basel III – Pillar 3 disclosures of India Branches** (*Continued*)

For the year ended 31 Mar 2019

## 14. Regulatory capital Instruments

The Bank has not issued any regulatory capital instruments in India.

## **15.** Disclosure Requirements for Remuneration

In accordance with the requirements of the RBI Circular No.DBOD.NO.BC. 72/29.67/001/2011-12 dated 13 January 2012, the Head office of the Bank has submitted a declaration to RBI that the Bank's compensation policies including that of the CEO, is in conformity with the Financial Stability Board principles and standards.

## 16. Equities - Disclosure for Banking Book Positions

Investment in equity shares as at 31 March 2019 is Rs.136 million. This includes investment in shares of private limited companies held either for:

- (i) business facilitation purpose;
- (ii) acquired as part of Corporate Restructured Debt(CDR) package; or
- (iii) in one instance investment in group subsidiary.

These investments are classified as 'Available for Sale'(AFS). All investments in equity shares are held in Unlisted limited companies. There are no quoted market prices for these securities. Accordingly, these are valued at lower of cost or break-up value basis the latest available balance sheet.

#### **Quantitative Disclosures**

- 1. The value of equity investments (unquoted) as at 31 March 2019 is Rs.136 million.
- 2. All equity investments are held in private limited companies.
