

## HSBC's Life Insurance Products with Product Risk Rating – (Oct 2020)

This document provides the HSBC Product Risk Rating for all life insurance products (HPRR-LI) distributed by The Hongkong and Shanghai Banking Corporation Limited, India, incorporated in Hong Kong SAR with limited liability and having its India corporate office at 52/60 Mahatma Gandhi Road, Fort, Mumbai - 400 001 (HSBC India). HPRR-LI is an internal risk score for each life insurance product and its underlying funds (if any) which is arrived at by taking into account several risk factors including but not limited to volatility equity component in the underlying fund. The list of products distributed by HSBC India, (along with underlying funds, if any)), and their respective HPRR-LI is appended below.

Internally, the HPRR-LI is mapped to the customer's risk profile in an attempt to chart product suitability to each customer's risk profile. The customer's risk profile is established when the Risk Profile Questionnaire (RPQ) is completed by the customer. Customers are requested to check product appropriateness (based on HPRR-LI) with their individual risk profile (based on RPQ), as per the classification in the appended table, before purchasing a life insurance product. This document is updated on a regular basis and is made available on the website of HSBC India, [www.hsbc.co.in](http://www.hsbc.co.in). It is recommended that each customer refers to the latest HSBC Product Risk Rating (HPRR-LI) document prior to purchasing any life insurance policy distributed by HSBC India.

Any customer who has not yet established their risk profile by completing the RPQ may contact their relationship manager or visit the nearest branch of HSBC India to do the needful. The RPQ includes questions that provide some indication of the risk tolerance of a customer, displaying the customer's personal investment characteristics. It may not match the respective customer's actual attitude toward investment risk, but may indicate the profile that the customer may fit into.

The appended table reflects the HPRR-LI matrix, mapping the HPRR-LI to the customer's risk profile. For e.g. if the customer risk profile is "Cautious" then the products risk categories appropriate for the customer are 'P1' and 'P2'. In this case the products 'P3', 'P4' and 'P5' are not appropriate to customer's risk profile. Similarly if a customer is, say, 'Aggressive', then products with risk rating 'P1', 'P2', 'P3' and 'P4' are appropriate while 'P5' is not appropriate.

### Customer's Risk Profile – Product Risk Rating matrix

Customer's Risk Profile/Product Risk Rating	P 1	P 2	P 3	P 4	P 5
	<b>The risk matrix demonstrates risk to the customer, where P1 refers low risk and P5 refers to high risk and others are graded in between</b>				
<b>Secure</b>	Not Appropriate				
<b>Very Cautious</b>	Appropriate	Not Appropriate			
<b>Cautious</b>	Appropriate		Not Appropriate		
<b>Balanced</b>	Appropriate			Not Appropriate	
<b>Aggressive</b>	Appropriate				Not Appropriate
<b>Very Aggressive</b>	Appropriate
