

Banknotes with new numbering pattern and special features for the visually impaired.

We refer to RBI circular no. RBI/2015-16/188 DCM (Plg) No.G-6/1128/10.01.24/2015-16, and wish to provide guidance on Banknotes with new numbering pattern and special features for the visually impaired.

Reserve Bank of India is issuing Banknotes in Mahatma Gandhi Series 2005 with a new numbering pattern and special features for the visually impaired in ₹100, ₹500 and ₹1000 denominations.

In the new numbering pattern, the numerals in both the number panels of these denominations ascend in size from left to right, while the first three alphanumeric characters (prefix) remain constant in size. Printing the numerals in ascending size is a visible security feature in the Banknotes so that the general public can easily distinguish a counterfeit note from a genuine one.

Special features for the visually impaired have been introduced in order to make it easier for them to identify Banknotes, the size of the Identification Mark in ₹100, ₹500 and ₹1000 denominations has been increased by 50% and angular bleed lines - 4 lines in 2 blocks in ₹100, 5 lines in 3 blocks in ₹500 and 6 lines in 4 blocks in ₹1000 denominations, have been introduced.

The design of Banknotes of ₹100, ₹500 and ₹1000 denomination is similar in all other respects to the current design of Banknotes in Mahatma Gandhi Series 2005. All the Banknotes in these denominations issued by the Reserve Bank in the past will continue to be legal tender.
